

## IYSA COVID-19 REPORTING PROCEDURES

For COVID-19 tracing purposes, all teams/groups including but not limited to players, coaches managers, trainers and team personnel have to remain static. Each league/club must have its own COVID-19 protocol and reporting process that conform to the IYSA Protocol for COVID-19, the Illinois Department of Public Health, and CDC guidelines.

If a team participant including but not limited to players, coaches, managers, trainers, etc. tests positive, the entire team must quarantine! The team/club must advise the other members of the team, the opposing team's coach/team manager, the League or Hosting Organization, and submit the name of the COVID-19 positive person and a list of the persons with whom the COVID-19 positive person came in contact to their local Department of Public Health. With the exception of the Department of Public Health, the name of the COVID-19 positive person must remain confidential.

- Anyone who has come in contact with someone who tests positive for COVID-19 must quarantine for fourteen (14) days and advise their team/club thereof. If that person shows any signs or symptoms of COVID-19, he/she must immediately contact their healthcare provider and advise their club.
- Anyone who tests positive for COVID-19 must quarantine for at least fourteen (14) days and not show any signs or symptoms of COVID-19, have no fever for at least 72 hours without fever-reducing medication or have 2 negative COVID-19 tests in a row with testing being done at least 24 hours apart and submit to their Club/League prior to returning to activity a signed written clearance from a medical doctor showing that the person has been cleared to participate.

For friendlies/tournaments, the team/club must advise the event's Hosting Organization. For league games/practices, the team/club must advise its League.
